

MSA continues renovation work at CVG International Airport

October 27, 2011

Set to reopen in mid-2012, MSA Architects is working on the most recent renovation project at the CVG International Airports Terminal 3/Concourse A. Based on the Teams original Vision package to convert the spaces into a multi-use and traveler-friendly environment, the concourse will be themed around our very own River City with soaring ceilings and a plethora of natural light. Speckled with local artwork, the newly designed Concourse A is designed for the modern, everyday traveler with a plenitude of charging stations, Wi-Fi access and an endless array of power outlets nestled in the rows of waiting area seats.

Design intricacies do not stop at the Concourse. The restrooms are envisioned as luxurious resting stations that are not only functional and convenient, but aesthetically pleasing.

Concourse A has been vacant since Delta downsized and moved out in 2010, allowing the Airport to take advantage of the largest and most convenient concourse positioning with the relocation of all five current airlines flying out of the CVG to Terminal 3. The renovation is expected to attract new low-cost airlines to the CVG, reinvigorating not only the Concourse spaces, but also the economic well being of the Airport.
